

# Personal Highlight Videos & Game Tapes from an Academic Basketball Camp

With the prominence of the social networks in the activities of our every day life, college coaches have naturally turned to the Internet to find athletes through watching highlights of games and the players' Personal Highlight Videos in addition to their traditional sources of information: scouting services and seeing players in person. The competition for scholarships and spots on college rosters has never been as fierce as it is today with more players competing for opportunities. A highlight video is now a standard tool for players; a professionally produced personal highlight video is a smart decision to get noticed. While it cannot make you play better it can make you look better.

## The Online PERSONAL HIGHLIGHT VIDEO – [www.VideoForCoaches.com](http://www.VideoForCoaches.com) for examples

A professionally produced 1-2 1/2 minute Highlight Video documenting strengths from footage shot at the Academic Basketball Camp, Elite Student Athlete Prospect Camp and Hoop Mountain All Academic Camp. The video will be posted online & can be linked in emails you send to college coaches.
